

Press Release 1/10

SCONRAIL UK is „Notified Body Interoperability“

SCONRAIL was founded in 2006 in order to become a “Notified Body Interoperability” in Switzerland and to perform the EC examinations in the railway field. This however is not possible yet due to the delays in the implementation of the interoperability directives of the European Community into the Swiss railway legislation.

In the meantime, the SCONRAIL subsidiary

SCONRAIL UK Limited
Sutton, Surrey
United Kingdom SM1 4AF

has been accredited by UKAS and notified by the British Department for Transport. SCONRAIL UK is officially published on the NANDO Website under the number

NB 2237

as “Notified Body Interoperability” in accordance with the Directive 2008/57/EC of the European Parliament and of the Council, dated 17 June 2008, on the interoperability of the rail system within the Community.

SCONRAIL can facilitate issuing EC certificates through the “Notified Body” of the parent company TÜV Rheinland InterTraffic in Denmark. From today, SCONRAIL is in a position to issue EC certificates under the name SCONRAIL UK Limited. The reduced interfaces will accelerate the processes.

Assessment is performed by the approx. 100 specialists of the parent companies ENOTRAC, PROSE, TÜV Rheinland InterTraffic with their expertise in the various fields of the railway.
